

CHATEAU  
LAUBÈS  
BORDEAUX

# The Bordeaux Know-how

CHÂTEAU LAUBÈS IS SITUATED IN THE COMMUNE OF ESCOUSSANS WHICH IS IN THE ENTRE-DEUX-MERS WINEGROWING REGION, CLOSE TO THE COMMUNE OF CADILLAC. IT IS A BEAUTIFUL PROPERTY WHICH EXTENDS OVER AN AREA OF 38 HECTARES.

A beautiful traditional girondine house bears witness to the rich historic heritage of the region. Located on south/south-west facing hillsides and facing the Garonne riverbed, the 38 hectare vineyard benefits from a privileged position which gives maximum exposure to sunlight. Spread over 4 communes the difference in the terroirs gives the wine a great personality.

BORDEAUX

# Garden side

The vineyard develops over a pebble and clay sub-soil which are characteristic of the **Entre-Deux-Mers** region. **The red wines** are made entirely from the **Merlot** grape variety. **The white wines**, which are produced in smaller amounts, are made from younger vine **Sauvignon**.

## A STRONG COMMITMENT: A PROPERTY WHICH RESPECTS THE

Chateau Laubès practices integrated precision viticulture and at the same time has been engaged in a **process of Level 3 HVE Certification**.

Keen to respect the environment and our terroir we have put several measures into action:

- **Winter sowing and allowing the land to lie fallow:** certain plots are allowed to lie fallow in order to help **maintain the ecological reservoir zones**. This **ancient technique** offers a two-fold advantage in so much that it allows **the development of the biodiversity** whilst at the same time favouring a **reduction in the use** of fertilizers.
- **Observing the vine:** by using tools which help in decision-making and by closely observing the vine we are able to reduce the use of products on the vine.

# Courtyard side

## WE FAVOUR THE USE OF **PLOT SELECTION**

Chateau Laubès makes use of traditional vinification techniques. In order to **guarantee the preservation and the freshness of aromas** we undertake cold pre-fermentation maceration for about ten days for the red wines. With the same aim in mind, we use cold stabilisation for ten days on the white wines.

VINEYARD AREA  
**38 hectares**

AVERAGE AGE OF VINES  
**21 years**

AVERAGE YIELD  
**55 hl**

AVERAGE VINE DENSITY  
**4 000 vines/hectare**

GRAPE VARIETIES  
**100% Merlot**

SOIL  
**Clay limestone  
Silty clayey sandy soils**

# Our Cuvées

THE WINES OF CHATEAU LAUBÈS CAN BE CHARACTERISED AS SOFT AND ROUND.

ÉLEVÉ EN FÛTS  
DE CHÊNE

Château Laubès offers a range of wines which are typical of the Bordeaux area vineyard and which will delight all palates. The rosé wines, just like the white wines, are delicately balanced between roundness and liveliness.

The red wines from Chateau Laubès are complex wines with aromas of black fruit and violets.
